TABLE OF CONTENTS:

[Why Monkeys Matter](#)

Ethical concerns can't be ignored when it comes to primates in labs and the influences on their fate.

A Behaviorist's View

Behavior can give insights to the state of an animal's well-being.

Chimpanzee Research & the Road to Retirement

An overview of chimpanzees in research and moving towards its end.

[The Use of Primates in the EU](#)

While primates are used in research in Europe, the laws, regulations, and policies surrounding their use are different than in the U.S.

Interview Profile: Shirley McGreal

Determined as she is dedicated, Dr. McGreal is making a lasting difference for primates.

Interview Profile: John Gluck

A former researcher turned primate advocate, Dr. Gluck shares his unique perspective on nonhuman primates in the laboratory.

Special Report: Primates by the Numbers

There has been a growing trend in the research industry's importation of nonhuman primates into the U.S. for use in testing and research. AAVS exposes the numbers, the participants, and the animal suffering.

What is Enrichment?

Though hard to define for some, enrichment is a necessity for nonhuman primate well-being.

DEPARTMENTS:

First Word

AAVS makes a promise.

News

Allergan Will Reduce Animal Tests; Scientists Call for a Ban on Chimp Experiments;
Animal Transport Leads to Monkey Deaths; New Mechanism Studies Brain Function; Class
B Animal Dealer Shuts Down.

AAVS Action

ARDF Announces Grant Recipients; Animalearn's Humane Educator of the Year; Meet
Hugo Naturals.

Giving

Help animals retired from labs.

Tributes

Special friends honored and remembered.

Member's Corner

Looking at primates in a new light.
